SUMMARY

Final semester student at Multimedia Nusantara University majoring in Informatics and has experience web development with demonstrated history of working on a personal and team projects. Graduated from the Certified Independent Study program on Front-End and React.js. Proficient and certified by Dicoding in Expert React and Front-End Web Development. Strong engineering professional with a Bachelor of Computer Science degree, able to create websites from both frontend and backend sides and has a high desire to learn about web development.

EXPERIENCE

Dicoding: Study Independent

Front – End and React   Aug 2022 – Des 2022

- Proficiency in using React.js with state management Redux in building interactive websites which include clean code, automation testing with Jest and Cypress, and deployment with CI/CD.
- Proficient in building websites using Mobile First Approach and implementing Progressive Web Apps which makes website has native behavior, and improve web performance.
- Able to build websites that implements Asynchronous JavaScript Request for data transaction using Fetch API for get, post, put, and delete methods.

PT Hashmicro Solusi Indonesia

Software Implementation Consultant   *Feb 2022 – Jun 2022*

- Learn about the flow of enterprise resource planning (ERP) software, so that it can assist in the process of solving errors and helping client to input their data.
- Successfully collaborated and communicated with more than 5 clients in 2 different company which resulted in better project execution.

SKILL

Next.js, React.js, Redux, PHP, Laravel, SQL, Java, Spring Boot, Typescript, Javascript, Jest, Cypress, Tailwind CSS, Bootstrap, CSS, HTML, Vercel, Figma, GitHub.

PROJECTS

DiaCare   *https://diacare.site/*

- DiaCare is a web-based diagnose application to help people diagnose diabetes mellitus disease. Admin can set the diseases, symptoms med and rule base which will be used for the forward chaining method. This application also gives user bunch of information from medicine until advice to avoid or threat the disease. – Build using PHP Laravel and Tailwind CSS, Host using Hostinger | features : login, register, diagnose, track history, users, dashboard for users and admin, crud symptoms, diseases, solutions, medicines, rule base.

ForumNGo   *https://discussion-forum-test.vercel.app/*

- ForumNGo is a web-based forum application to help people find some discussion or topic, user also can add discussion and discuss some topics together. – Build using React.js, Redux, Bootstrap, Testing with Jest and Cypress, Eslint – PropTypes. Connected to Dicoding API | features : login, register, create threads, leave comments.

Open Space App   *https://open-space-app-bice.vercel.app/*

- Open Space App is a web-based twitter look a like application where users can create some threads add comments and see parents threads. – Build using React.js, Redux, Eslint - Proptypes, Testing with Jest and Cypress. with Dicoding API | features : login, register, create talk, view talk parent, add comments.

Co Money   *https://comoney-dicoding.web.app/*

- CoMoney is a web-based financial management utility Application to help people manage their finances with income and expenditure dashboard features, savings targets with automatic calculations, and daily financial news. – Build using React.js React Router, React Context, Axios, Lazysizes, SweetAlert and Bootstrap | features: Record and monitor daily and monthly expenses and income, provides daily global financial news, create a savings plan, as well as display information on how much money should be set aside each month.

Note Book 2   *https://note-book-app-2.vercel.app/*

- Note Book 2 is a web-based utility application where users can add some notes, archive it or edit it, this application also provides dark mode – Build using React.js, React Router, React Context, Hooks, Path & Query Params. Connected to Dicoding API | features : dark mode, change app language, login - register - logout, add note, delete note, archive note, search for notes.

EDUCATION

MULTIMEDIA NUSANTARA UNIVERSITY *Aug 2019 - Present*

Bachelor of Informatics - GPA 3.54 out of 4.00

- Studied the fundamentals and theories of computing.
- Learned how to arrange data and information that can be integrated into a system.

ORGANISATIONAL EXPERIENCE

OMB 2021 *Mar 2021 – Aug 2021*

Equipment and Logistic

- Preparing zoom meeting and assets of 5 different division, so that the New Student Orientation event runs smoothly.
- Successfully collaborated and communicated with the event division so that the activities run according to the predetermined rundown.
- Broadcasting a live tour of the UMN 360 campus during the event so that new students can get to know the campus area comfortably.

LICENSES & CERTIFICATIONS

- Dicoding – Menjadi React Web Developer Expert
- Dicoding – Menjadi Front-End Web Developer Expert
- Dicoding – Belajar Fundamental Aplikasi Web dengan React
- Dicoding – Belajar Fundamental Front-End Web Development
- Dicoding – Membuat Aplikasi Web dengan React
- Dicoding – Membuat Membuat Front-End Web untuk Pemula
- Dicoding – Belajar Dasar Git dan GitHub
- Dicoding – Belajar Dasar Pemrogramman Web
- HackerRank – JavaScript (Basic)
